

COMPANY PROFILE

Homeland Technology
Company Limited

FOCUSED,
SOUND,
& INNOVATIVE

3 WORDS THAT BEST DESCRIBE OUR
APPROACH AND OUR TEAM

Incepted in 2018, Homeland Technology Company Ltd is a Software Development, Information Technology Services and Consultancy firm providing competitively priced outsourcing services to companies worldwide.

Having a strong local presence in Tanzania, Homeland Technology has made its mark as a well-established and sound company driven by the industry's highly professional and trained individuals and is surely headed in becoming a leading organization which facilitates, enhances and provides measurable business value through most effective uses of Technology and Resources to organizations globally.

Highly skilled intellectual personnel, most having substantial work experience in diverse areas of Information Technology make up the team. Our management ensures that each individual excels in their specific assigned tasks by working closely with them.

Only those individuals are hired who not only possess strong technical and analytical skills, high intellect, sound work ethics and integrity but also who have confidence, decision making abilities and above all the drive to excel whether it is at the management level or at a technology/software development position.

Our focused, sound and innovative approach is derived from the cumulative experience of our team members. As a result of their combined practical business experience with strong technology delivery capabilities, we are able to comprehend the client's business requirements, propose IT and creative strategies in line with the vision of the business and execute the business plan by building or implementing high quality scalable business solutions through the use of latest cutting edge Technologies.

Words from the Founder

Hello welcome to Homeland Technology Company Limited.

Am very happy to talk to you through this medium, our company is just two years old since its inception, with this two years we have managed to delivery great services to our customers earning a good reputation in the market. We are committed to delivering high quality services that cause echoes to our competitors rejuvenating us in terms of intellect and discoveries. To us integrity and loyalty are our cornerstones in our daily operations in this era of fast growing technology; we have to be strong when tested by providing relevant solutions to the public's high pressing needs and problems. This is through partnership in innovation and utilizing well the available resources and breakthroughs that others have labored. Be assured that we will be friendly to you, and your opinions are highly appreciated, valued and respected, come and do business with us, grow with us or help us to, thank you.

Emmanuel Ernest Nollo

COMMITTED TO PROVIDING SUBSTANTIVE BUSINESS VALUE

Homeland Technology Company Limited is committed to providing substantive business value of each and every product developed and client engagement. We achieve this through a combination of expert Industry-Specific business analysis, strong technical skills, sound project management methods and traditional values.

We strive to work in collaboration with our customers to be able to build high performance teams necessary for creating and maintaining world class business solutions. We have qualifications in the areas of Information Technology planning, Custom Software Development, Web Centric Software Solutions, ERP development and implementations, Creative Designing and Marketing with emphasis on Industry-Specific Business Analysis and the use of latest technologies for the development and implementations of leading business solutions that work in an enterprise area globally.

6 REASONS THAT MAKE US THE PREMIER CHOICE

INTELLECT & EXPERIENCE

Highly skilled professionals who possess expertise in diverse Business and Technology areas make up the Homeland Technology Company Limited Technologies team. To provide world class service, we employ the best technicians, adhere to proven methodology, provide superior client service and become a true business partner in every project.

OUR APPROACH

Our Roadmap to development is a collection of eight steps, each of which has its own significance.

- o Data Mining
- o Forming a sketch
- o Designing
- o Making a blue print
- o Constructing
- o Testing
- o Deployment
- o Maintenance & Up gradation

COMMITMENT TO QUALITY

We believe in Quality service and our approach has been designed to provide the same. We listen carefully to our clients and provide space, time and materials according to agreement for the project. We are proud of our Technical and Creative capability and this emerges from taking time to get it right. Our Quality Assurance Department tests throughout the process to ensure that the project will be successful.

ON TIME DELIVERY

We invest the time up-front to clearly understand your needs and then manage projects to ensure they are delivered on time and within budget. This methodology expedites rapid successful implementation, limits uncertainty and keeps the customer always aware of development progress at our end.

COMPETITIVE PRICING

We render services to our clients at a very competitive price and depending on the type of client engagement we offer them the most suitable pricing model structure which could either be fixed price based, time and effort based or a dedicated offshore team model.

TRACK RECORD

We have handled small - large scale projects and have over the years implemented solutions for numerous organizations of all sizes. Our growing list of satisfied customers' not only act as our excellent references but are also a source of our repeat business.

SERVICES

Expertise, thorough knowledge and firsthand experience along with strong Industry specific research skills help us in analyzing, designing and implementing world class solutions.

SOFTWARE DEVELOPMENT SERVICES

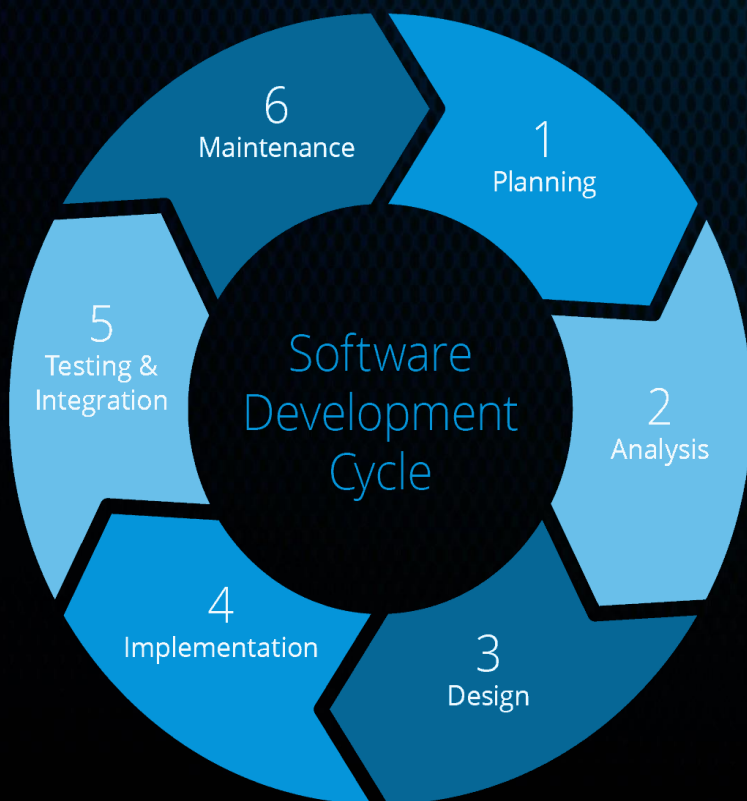

Since inception we have been providing state of the art Custom Software Solutions to midsize/large organizations. In developing custom software, we see our role as partners, not merely programmers. We recognize that solutions succeed not solely for technical reasons, but because end-users and internal IT staff feel ownership.

Our Rapid Application Development (RAD) model development capabilities offer significantly reduced development time and savings in developing, implementing and maintaining custom Enterprise applications.

In the last decade, a number of management philosophies have been developed in an attempt to define what companies must do to compete in the new global economy. Emphasis is now placed on the use of enterprise-wide information solutions to impact the decision processes of management. Organizations have rediscovered the basics, realizing that the most effective strategy is to organize their resources in order to achieve better performance. Today's dynamic business requirements need dynamic information solutions. Generic software is not flexible enough to meet the diverse demands of each unique business. Considering all the aspects in mind we design cost effective tailor built, high performance software for organizations that need made to order, high-end customized solutions

Software Testing.

OPEN SOURCE & CMS CUSTOMIZATION AND IMPLEMENTATION

Homeland Technology Company Ltd specializes and provides customization and development services for Content Management System (CMS) and Open Source web-based applications on platforms like Joomla, Magento, WordPress, Sitefinity and Dotnet nuke.

Homeland Technology Company Ltd has dedicated and versatile teams that excel in coding (PHP / .Net / MySQL) as well as designing (CSS, HTML). We work closely with clients to deliver the projects with excellent quality and within the timeframe. Our team puts extreme efforts to identify the best options that suits client's business needs.

WHY OPEN SOURCE MATTERS?

Homeland Technology Company Ltd helps in open source customization of various products to suit your needs by creating templates, adding custom modules or changing the product functionality. Our strength lies in providing Open Source Customization services on different products to suit our client's needs.

WordPress

Homeland Technology Company Ltd can design, develop, and implement a WordPress system to suit your specific requirement. We have thorough HTML and CSS knowledge, and experience in WordPress blog customization. Using the current theme will save your time and costs.

Moreover, our managed hosting services provide an optimal environment for platforms of WordPress to operate in, that ensures best performance.

Magento
Open Source eCommerce

At our Company we have experts and providers of Magento ecommerce solutions. We are playing a critical role in the continued adoption and growth of Magento. We provides Magento Ecommerce based online stores ecommerce solutions, which can help the online merchant to get total control and create no restraints on the business process or flow that is involved.

Joomla!

Joomla! is one of the world's most powerful system of Open Source Content Management. It is used worldwide for everything from simple websites to complex corporate applications. Joomla is simple to manage, easy to install and reliable. If the functionalities of CMS are not enough for you, Joomla let you add extra tools on your website. With Joomla you can have ecommerce, gallery add-ons, forums and so on. Homeland Technology Company Limited is specialized in open source customization in Joomla CMS and recommends Joomla CMS solutions wherever necessary.

DOTNETNUKE

Our Company is one of the premier DotNetNuke web solutions providers. We develop, integrate and host CMS, Line of Business Web Applications and Web Services. We serve the world wide DotNetNuke community by providing the best quality modules of DNN, DNN skins and services in custom development. Homeland Technology Company Ltd solutions also have significant experience on core .Net Technologies and can extend the functionalities to new heights. Please view our Web Development Service section to view further details.

sitefinity

Telerik Sitefinity is an ASP.NET based Content Management System (CMS) that enables the construction of dynamic, fully editable Web sites. Sitefinity provides the tools for quick and easy construction of a wide variety of attractive and functional Websites. Homeland Technology Company Limited team has delivered reasonable number of projects on this platform and the teams also have the capability to extend the usage by adding customized functionalities.

Das
Blog

dasBlog is an ASP.NET blogging application. dasBlog is an evolution of the BlogX weblog engine and it does not require a database, so it is easier to get setup and cheaper to host. Homeland Technology Company Limited is specialized in customization and implementation of dasBlog and recommends dasBlog wherever necessary.

yaf.net

YetAnotherForum.NET (YAF) is a powerful Open Source discussion forum or bulletin board system for web sites running on Microsoft .NET. Homeland Technology Company team is highly proficient in integration of Microsoft .Net supported open source forums and has the ability to seamlessly integrate this open source solution as per your requirements and expectations.

CWS

MOBILE APPLICATION DEVELOPMENT

The growing popularity of Smart phones is packing all sorts of bells and whistles. Powerful processors, abundant memory, larger screens, and potent operating systems are enabling users to do most of the chores without using their computers and laptops. The ability to communicate by sending instant messages and e-mails, access the Internet or get directions via GPS are just some of the many features that handset owners are growing progressively more inclined to utilize. This is opening a lot of opportunities for visionaries all over the world; we can assist you to translate your idea into reality.

We create value-added applications tailored exactly to your specific business requirements for enhanced efficiency, functionality and value addition. Homeland Technology is vastly experienced in developing and testing Mobile Applications.

Our team has a passion for Mobile Application development and we always follow new trends and changes in this high-tech arena. We have proficient technical teams to deliver complete solution, from design to development.

CUSTOM ENTERPRISE SOLUTIONS

Since inception we have been providing state of the art custom enterprise solutions to midsize to large organization. In developing custom applications, we see our role as partners, not merely programmers. We recognize that solutions succeed not solely for technical reasons, but because end-users and internal IT staff feel ownership.

Our Rapid Application Development- RAD model development capabilities offer significantly reduced development time and savings in developing & implementing custom Enterprise Resource Planning (ERP) applications.

In the last decade, a number of management philosophies have been developed in an attempt to define what companies must do to compete in the new global economy. Emphasis is now placed on the use of enterprise-wide information solutions to impact the decision processes of management. Organizations have rediscovered the basics, realizing that the most effective strategy is to organize their resources in order to achieve better performance. Today's dynamic business requirements need dynamic information solutions. Generic software is not flexible enough to meet the diverse demands of each unique business. Considering all the aspects in mind we design cost effective tailor built, high performance software for organizations that need made to order, high-end customized solutions.

We have developed flexible frameworks for such tailor built Enterprise application development and have successfully implemented solutions for mid-size - large concerns in the following industry:

- Process Manufacturing implementation in : Pharma sector
- Retail and Distribution implementation in: Health Care sector
- Manufacturing, Retail and Distribution (MRD Solution) implementation in: Health Care sector

The custom built comprehensive ERP's developed for our clients include a comprehensive range of services and integrated modules.

- Customer Relationship Management
- Supply Chain Management
- Management Information Systems
- Sales Management Accounting and Financial Management
- Material Planning
- Quality Management
- Inventory Management
- Production Management
- BI / KPI Consoles

Enterprise Resource Planning (ERP) IMPLEMENTERS

Enterprise resource planning (ERP) is a process used by companies to manage and integrate the important parts of their businesses. Many ERP software applications are important to companies because they help them implement resource planning by integrating all of the processes needed to run their companies with a single system. An ERP software system can also integrate planning, purchasing inventory, sales, marketing, finance, human resources, and more.

You can think of an enterprise resource planning system as the glue that binds together the different computer systems for a large organization. Without an ERP application, each department would have its system optimized for its specific tasks. With ERP software, each department still has its system, but all of the systems can be accessed through one application with one interface.

ERP applications also allow the different departments to communicate and share information more easily with the rest of the company. It collects information about the activity and state of different divisions, making this information available to other parts, where it can be used productively.

ERP applications can help a corporation become more self-aware by linking information about the production, finance, distribution, and human resources together. Because it connects different technologies used by each part of a business, an ERP application can eliminate costly duplicate and incompatible technology. The process often integrates accounts payable, stock control systems, order-monitoring systems, and customer databases into one system.

- ERP software can integrate all of the processes needed to run a company
- ERP solutions have evolved over the years, and many are now typically web-based applications that users can access remotely.
- An ERP system can be ineffective if a company doesn't implement carefully.

To address this need, we recommend softwares such as SAGE Software for world-class service. SAGE Group plc comprises market-leading businesses throughout Europe, North America, South Africa, Asia and Australia supplying business management and finance software to more than 2.3 million clients in 150 countries. SAGE Enterprise Resource Planning (ERP) software and Accounting & finance solutions adhere to a proven and tested methodology, provide superior user-friendly interface along with many other features. As professionals, we assess the growing business needs of organizations to automate and organize complex business procedures by working closely with customers. We evaluate, recommend and implement the most suitable solutions that fulfill your business needs.

BENEFITS OF ERP

- Completely Web-Based
- Easy to Use and Customize
- Ultimate Scalability
- Designed for Global Business

- Order Entry
- Accounts Receivable
- National Accounts Management
- Return Material Authorization (RMA)
- Inventory Control
- Project and Job Costing
- System Manager

FINANCIAL AUTOMATION

FINANCIAL AUTOMATION - GET IT DONE THE RIGHT WAY

A series of changing market trends are reshaping the financial management needs of companies of all sizes, especially small and midsize business. These companies as they grow are faced with the same business and legal requirements as larger enterprises. Gaining a competitive advantage and maintaining a loyal customer base has become a lot harder due to an increasingly commoditized marketplace and at the same time many businesses are increasingly reliant on a dispersed workforce of remote or mobile employees due to the growth of the internet.

TODAY'S GROWING BUSINESSES ARE FACING UNPRECEDENTED CHALLENGES AND OPPORTUNITIES

In order to manage these escalating challenges and fully capitalize upon today's expanding market opportunities, many growing companies are recognizing they must adopt robust financial management systems to support their businesses. The organization's workforce must submit key data to the company's financial system and must be able to access this corporate information from anywhere, at any time to do their jobs effectively.

MAIN FEATURES

The requirement of having a full featured accounting system that can be accessed anywhere at any time is compelling many growing firms to investigate affordable alternatives to packaged software such as QuickBooks and Peach Tree as companies often seek a system that

- Automates complex revenue management, including support for deferred revenue management and multi element arrangements.
- Supports multiple business entities and on demand financial consolidation.
- Delivers real time financial visibility.
- Provides audit ability that satisfies regulatory and compliance requirements.
- Seamlessly integrates with other applications in your eco system.
- Provides anytime, anywhere access.

To cater to the financial automation requirements of these growing small and mid-sized firms, Homeland Technology Company Limited - An easy to use full featured core financial automation system making business management easy by providing complete access to your accounting system functions AP, AR and GL anytime, anywhere through an easy to use web interface. VAS is a robust financial management system

- That handles your increasingly complicated transactions.
- Helps you to better forecast and track your revenue flows.
- Allows you to keep a closer eye on your cost structures and adhere to tighter accounting and regulatory compliance standards.

TECHNOLOGY INTEGRATION SERVICES

Businesses are evolving and becoming more and more demanding. Specialized software's are required to remove the functional barriers and improve organizational efficiency. Many corporations are still using systems that serve their standalone needs and have a hard time in communication. This means that a lot of time is spent on validating data, entering data into multiple systems and gathering data from many different systems. Time spent on these kinds of mundane tasks could be spent on serving your company's customers instead. Business Integration services give the ability to integrate the diverse data and information sources both within and outside your enterprise into a single coherent framework.

System integration enables communication between many independent systems and their processes. When we connect different systems and applications you get faster communication with a higher security in your internal and external processes. Flexible organizations, where cooperation and optimization for existing or new business areas are in focus, have already created and implemented software integration.

Homeland Technology Company Limited has abundance of experience and technical savoir faire in the integration of business software. Our consultants have a solid experience from short problem solving activities to large integration solutions, where we have implemented efficiency and structure in the integration environment. Our experience in system architecture is well suited for implementing an architecture that does not bog down the company but instead ensures that the company can enjoy an IT-architecture that delivers on the demands of the business.

In recent years, the company has enjoyed grand success in the integration of enterprise software.

Management Information System -MIS OUT SOURCING

Homeland Technology also provides MIS outsourcing services to small and medium sized businesses in order to improve their IT infrastructure and to streamline business processes and performance. We are currently relieving a number of SME's of the burden of having full time and costly internal IT employees. Using our team of professionals you will obtain the best of breed advice and expertise.

Some of our clients outsource small portion or all of their IT support to us but they all benefit by having:

- . Business Grade IT Support
- . Guaranteed Response Times
- . Expert Technology Advice
- . Broad Business Knowledge
- . Friendly Customer Service
- . Professional Trackable Systems

CONSULTANCY SERVICES

Homeland Technology Consultancy Services enable you in creating a vision for the future and reach consensus on investment priorities and information technology strategies for all major constituencies. Importantly, we focus on aligning these strategies and investment priorities with the immediate, short-term, and long-range goals of your organization. Finally, moving from alignment to action, your information technology strategies are translated into a detailed

phasing/implementation plan that identifies specific projects, time frames, expected results, budget, resource needs, and organization (management and governance).

With Homeland Technology Company Limited consultancy services, this comprehensive and realistic action plan, or road map, becomes a "living document" that will guide your organization's investments of money, time, and energy related to information technology management over a multi-year period, incorporating new technology, e-commerce opportunities, and regulatory compliance.

Homeland Technology Company Limited is proudly providing consultancy services to large scale organizations and above all has team members on board who are not only Microsoft certified but also have tremendous experience in business consultancy unlike traditional technology-centric approaches to information management and e-commerce, we at Homeland Technology Company Limited Consultancy Services focus on business transformation and applying our extensive experience in the Information Technology industry to help you:

Align your Information Technology strategy with your business processes.

Avoid pitfalls and ensure that IT initiatives are focused on the areas of highest "real value" to the organization.

Address targeted areas of improvement.

Enhance quality of care and support. Increase customer and employee satisfaction.

Strengthen financial results.

Homeland Technology Consultants help devise an Information Technology strategic plan that serves as a "road map" to guide capital investments over a multi-year period and alternately can also provide a "second opinion" regarding your current Information Technology strategic plan, projects already in the planning stage and/or perform return on investment analyses as well as assisting organizations with plan implementation including tactical planning, vendor selection & contract negotiation, applications management, applications delivery and systems integration through sound trustworthy consulting services across IT Management, Business Analysis, Technology and HR consulting domains.

CREATIVE, DESIGN & MULTIMEDIA

TESTIMONIALS

Chaffils Company Ltd

We are very happy to have Homeland Technology as our offshore development partner. Homeland Technology is an innovative and professional company that developed our website. With valuable software development services. We are very satisfied with our decision to work with Homeland Technology, as their expertise has translated into a distinct competitive advantage for us. Overall, Homeland Technology is a great company to work with.

*Engineer Charles
Mwang'onda CEO
Chafils Co Ltd*

Quick brain Tech

Homeland Technology has developed an application which helps us to capture and store the real time data coming from remote sites. The data is generated per minute basis and is being recorded 24 hours, 7 days a week. The application with its SQL database helps to store and manage the huge volume of data and also to extract it when required by our engineers. Throughout the development phase, Homeland Technology team provided high level of service and excellent after sales support. It was BT team's high level of professionalism which helped to deliver the project on time and within the budget.

*Edward James
Data and Applications Developer*

Software Hub

Homeland Technology software has made us effective beyond our imagination by streamlining our operations and processes. The time and monetary investments were fairly minimal, and the return on training investment was great.

*Jacob Mwashu
