

FUNDI APP

Maisha ni Rahisi na Fundi App

Fundi App Intro

Problem

Handymen in Africa are faced with limited access to decent and reliable work while their customers face a big challenge locating those who prioritize quality, affordability and reliability.

Existing solutions are fragmented offering contacts scattered across the web that are often not vetted which leads to the loss of income for the handymen, and money and time for the customer.

Solution

Fundi App is an on demand startup that uses a mobile application to connect customers to nearby vetted, affordable and reliable handymen.

Traction

- Company incorporated
- Product developed
- 70 Fundis trained and onboarded
- Awards / Recognition
 - Startup Istanbul Top 100 (year 2020)
